Once upon a time in Sigtuna...

Who are we?

International open association that promotes IP services over Digital Broadcasting platforms

- MoU signed in September 2001
- Established officially on the 22nd of January 2002
- Started work in Business and Technical aspects

What do we do?

The purpose of Forum is to be active in:

- Promoting open provisioning of mobile and residential Internet Protocol (IP) based Digital Broadcast Services in a mass market;
- Identifying the business considerations and propose viable business scenario
- Representing the interests of the Industry before legislative and regulatory bodies
- Promoting open standards and describe open technical solution

Concrete Achievements

- **Spectrum issues**
 - Copenhagen (ERO) workshop in 2003
 - Spectrum issues for pilots (national administrations)
 - Presentations in EBU & EICTA Switchover workshops
 - Inputs to RRC04 work via IPDC Forum members
- **Regulatory issues**
 - Reply to the consultations from the EC (RSPG, Interop.)
 - Inputs to the revision of the national media laws
- **Business activities:**
 - Market study undertaken by HPI
 - Business models
- **Technical activities:**
 - DVB-H is a nearly a standard, ETSI process ongoing
 - Work with the DVB-CBMS (Converg. of Broadcast and Mobile Services)
 - Presentations in IBC 2002/3, DVB World 2003/4, DigiTAG seminars, national seminars, IEC TC100 Committee)

Who are the members?

If you

- Seek to facilitate the growth of IP-based services over broadcasting networks 
- Want to act for getting spectrum and facilitating the regulatory issues in your country 
- Want to confront your views to make sure that your company can make money with IP broadcasting 
- Wish to exchange experience with other players 
- Wish to influence the work performed in various technical organisations 
- Exchange experience on pilots 

**You should Join the
IPDC Forum**
